

THE BEAST IS A MUSIC SERVER AND NOT A UPnP STREAMER

Universal Plug-And-Play (UPnP) Streamer

- Audio is decoded by the UPnP server.
- UPnP server must always be available to buffer the stream
- Audio is streamed to a device and has already lost quality

Music Server

- Audio data is retrieved from disk as raw binary
- No buffering
- Remote (NAS) data is de-jittered onto Solid State prior to playback

Power Heart Soul Control

THE BEAST POWER

THE BEAST POWER

The BEAST philosophy... start from the beginning with perfect quality AC power

- Extremely stable working power source that works according to the power conditioner principle
- Completely reprocesses the mains voltage before starting rectification, noise part-160db
- Discrete supply of the DAC board is temperature compensated, providing stable and clean operational voltages at all times
- All power circuit with unlimited dynamic (no limitation of current)
- All DC voltages fully isolated from each other
- Special wire for each DC voltage
- Fully shielded 100% electronic and magnetic isolation

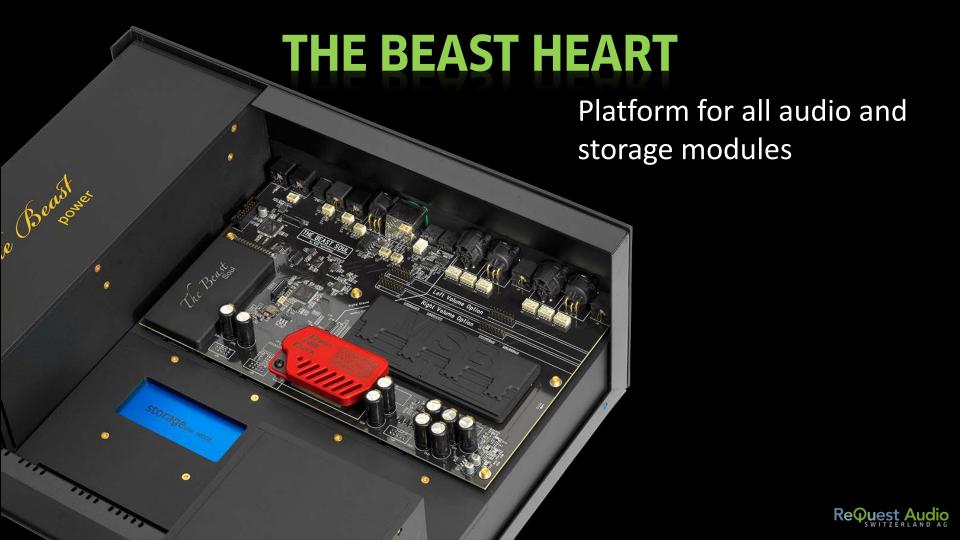

THE BEAST HEART

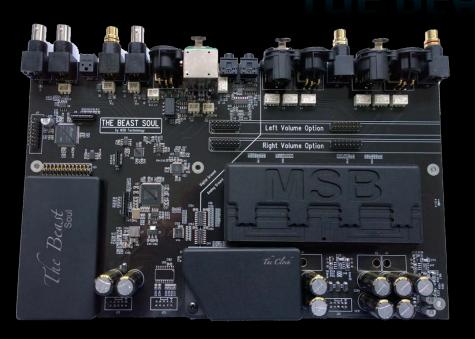

At the its core, THE BEAST is a solid aluminum block milled to exact specifications to integrate the computer motherboard.

THE BEAST SOUL

The **Soul** transforms simple data into wonderful music. We call it the **Soul** because it breathes life into the music.

Music becomes real and tangible with feeling and mystique. It creates dreams and emotions.

Music comes to life.

THE BEAST CONTROL

- Operation via premium class touchscreen
- Elaborate music search function
- Identical user interface for mobile devices and touchscreen computers

THE BEAST CONTROL

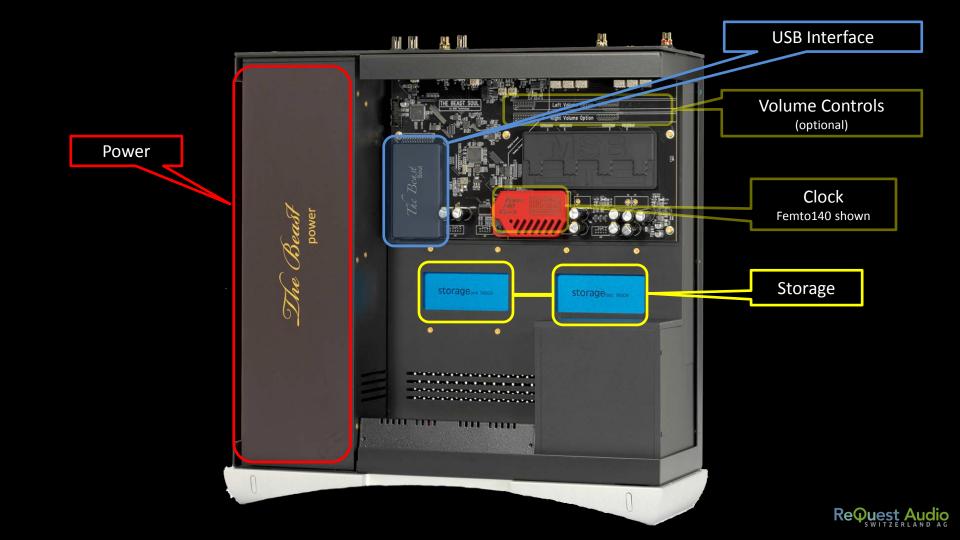

- Full settings functionality available on the touchscreen
- Smart and fast searching
- Classical fields (e.g. composer, conductor)
- Gracenote® metadata service
- High resolution cover art

10 Years Upgrade Warranty (2025)

Many digital devices are obsolete a few days after purchase.

THE BEAST philosophy is to guarantee that the customer always has the most up-to-date device.

A new generation of digital engineering allows us to guarantee at least 10 years of upgrades.

THE BEAST has a completely modular design and all components can be easily accessed and replaced.

THE BEAST USB INTERFACE

THE BEAST FILE TYPES

THE BEAST plays all music files bit perfect.

- DSD64 & DSD128
- WAVE 44.1kHz / 88.2kHz / 96kHz / 174.4kHz / 196kHz / 384kHz
- FLAC
- 16bit / 24bit / 32bit
- AIFF/ALAC import via NetSync for iTunes

THE BEAST STORAGE

- Tandem Solid State Drives (SSD)
- Up to 4TB internal storage
- Access unlimited external NAS storage
- EXT3-Journaled file system under Linux operating system
- Wide temperature tolerance from -20C to 80C

THE BEAST CLOCK

- Top model is Femto 77 Galaxy
- More precise clock sync results in less jitter (digital distortion)
- Three optional clocks: Standard, Femto140, Femto77
- Modular design allows for easy clock comparison and future update

THE BEAST VOLUME CONTROL

- Optional Volume Control changes THE BEAST into a preamp
- High precision analog volume control
- Shortest possible signal path with the least possible degradation of the true music
- Volume controlled in 1dB steps
- Signal path is completely bypassed when set to 0dB
- Shielded module to provide lowest noise floor possible

THE BEAST REVIEWS
