

Issue #17

Dulliken, 2015

Please find below the latest news around the soulution brand.

755 Phono-Preamplifier

The 755 phono preamplifier will set new standards in vinyl playback. It features the following highlights:

- 2 MC and 1 MM input
- ultra-fast and highly precise RIAA equalization stage
- preamp-grade output section
- preamp-grade volume control (optional)
- termination impedance adjustable via remote control
- new power supply for analog section

760 D/A-Converter

Like its analog counterpart the 760 DAC will redefine what is possible in digital playback. It features the following highlights:

- 5 digital inputs (USB, network, AES, SPDIF, optical)
- DSP based upsampling to DXD
- zerophase technology
- preamp-grade output stages
- custom made clock module optimized for lowest phase noise performance
- new power supply for analog section

Power supply upgrade for 746

The 746+ SACD-player does feature the new, much stronger power supply unit which we use as well for the 725 preamplifier. The connecting cables between the power supply and the player unit have been custom designed and optimized for this application by Vovox. The improvement in sound is more than astonishing. [Read more...](http://www.soulution-audio.com/en/serie7/746+/index.php) <http://www.soulution-audio.com/en/serie7/746+/index.php>

The 746+ SACD-player is an exclusive version for our distribution partner in Hong Kong and China who ordered all units of this limited production. However we provide the option to upgrade existing players (745 & 746) to this new version.
