

STENHEIM

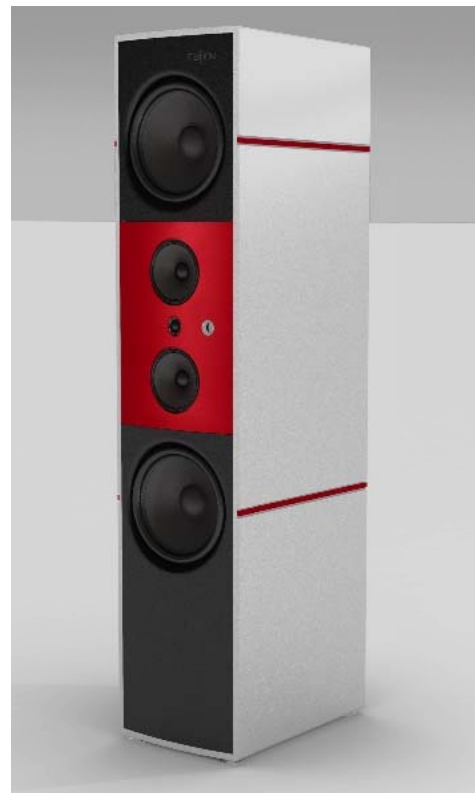

SWISS MADE AUDIO EXCELLENCE

INVITATION WORLD PREMIERE

Stenheim has the pleasure of inviting you to discover the REFERENCE range at the world premiere of its launch at High End 2014 in Munich.

This speaker was created in pure and well-studied lines to create not only a superb look, but unparalleled sound rendition, based on the concept behind the already well-reputed Alumine. It will enthral future owners with its exceptional musicality, its three-dimensional space, and vibrantly alive, natural soundstage. Then there's its flawless rendering of any genre of music, along with impressive sound levels from the deepest bass to the highest notes. The Reference is also distinct in its exceptional ease-of-use, thanks to remote operation of the MTM couple (medium tweeter) diffusion angle.

Steinheim will take the world of passionate audiophiles by storm, with its new state-of-the art speaker.

PROGRAMME
