# ALUMINE TWO

The Alumine represents a substantial deviation from conventional speaker design. With all-aluminum construction and hand-made, bespoke craftsmanship in Switzerland, Stenheim ensures unrivaled musicality and emotional engagement.

With high efficiency, the Alumine permits the use of high quality but lower powered amplifiers. Unparalleled speed combined with beautiful and rich tone elevates Stenheim from all to common audiophile fireworks and overhyped, but ultimately fatiguing designs.

With the ability to customize the finish with endless possibilities, aesthetic sentiments are addressed. With no exposed fasteners or screws, our watch industry team has created a fluid and stunning achievement in contemporary speaker design.

In an age of obsessive consumerism and product choice, Stenheim believes in pride of ownership and longevity. And while the Alumine manifests this philosophy, it is truly inspired by the passion and love for music.
