

SWISS MADE AUDIO EXCELLENCE

STENHEIM TO SHOW DURING CES 2015

After having demonstrated its top of the range REFERENCE speakers to enthusiastic hi-fi aficionados in shows in Hong Kong, Norway and Germany during 2014, it is now the turn of American audiophiles to hear these astonishing loudspeakers.

STENHEIM is to present these products at The Venetian in Las Vegas during the CES show from January 6th to January 9th 2015, Suite 35-310.

They will be sharing the room with Manufacture Le Son, Zensati, Spiral Groove and Qualia.

THE GLOBAL STAGE FOR INNOVATION

Combining carefully-designed and pure lines, the REFERENCE speakers have been crafted with the simple and singular objective: to push the boundaries of sound reproduction to the utmost. They are exceptionally musical speakers, creating a superbly natural, three-dimensional sound stage. Their dynamic performance makes them suitable for all forms of music, able to recreate the deepest bass and the highest treble notes. The REFERENCE is also distinct in its exceptional ease-of-use, thanks to remote operation of the MTM couple (medium tweeter) diffusion angle.

The REFERENCE line currently represents the pinnacle of STENHEIM's savoir-faire in terms of speaker technology. They are bound to garner an enthusiastic reception in Las Vegas.

With Stenheim, rediscover the sense – and sensation – of hearing. At last, listening is infused with a concert atmosphere, the audience's energy and enthusiasm.

Forget technology – simply experience music.

Made in Switzerland, our speakers combine unparalleled expertise and years of research to bring you exceptional sound.
