

A21SE Stage Two Phono Amplifier

There are two dedicated phono amplifiers in the Sugden range and both are borne from our passion for vinyl. The Stage Two offers exceptional value for money with facilities to cater for both MM and MC cartridges. The design is a two box system separating the power supply from the amplifier. The phono amplifier has fixed loading for MM and 100 and 470 Ohm selection for MC. Our design criteria was to produce a product that was as neutral as possible, retaining a faithful and enjoyable analogue sound.

Facilities

Inputs	Moving magnet, Moving coil LTVS power in
Outputs	Fixed line level output
Gain Adjustment	Internal selection for MM or MC
Load Adjustment	Internal for MC 100 and 470 Ohms MM fixed load 47k
Earth Terminal	Screw type
External Power Supply	Mains powered

Specifications

Input Sensitivity	MM 3.0mV MC 0.15mV
Output	350mV
Frequency Response	+/-1.5dB 20Hz-20kHz
Signal to Noise	>64dB
Gross Weight (packed)	2kgs
Dimensions	Phono amplifier 60 x 140 x 77mm (hwd) Power supply 50 x 140 x 77mm (hwd)
