

Introducing the Strauss Series[™] In-Waltz

Into the crowded field of like products, we have created our own unique, hand crafted architectural line of high performance loudspeakers: The Strauss Series[™]. As with everything we manufacture, this new series features old world craftsmanship with new world technologies guaranteeing true High-End performance with superior beauty and quality. To assure these principles, we build each piece carefully by hand in Vienna, Austria as we do with all our other products.

Taking advantage of our proprietary in-house technologies, we have created this first model of our new Strauss Series[™]. The new In-Waltz features a pair of our patented Spider-Cone[™] woofers mated with our proprietary large VA silk-dome tweeter. These drivers are then housed in a sealed aluminum cabinet with a piano lacquer front baffle. The baffle has additionally been beveled to insure optimum placement with the appropriate angling to insure the greatest musical presentation.

The grill has also been carefully designed to offer the most transparent sonic effect while retaining the symbolic V-Groove aesthetic of our Concert Grand Series[™] all while maintaining a paintable surface for the most custom installations.

Vienna Acoustics – The Art of Natural Sound™
