RCA TYPE CONNECTORS - RoHS COMPLIANT

ILLUSTRATIONS NOT TO SCALE

WBT-0101 Topline

WBT-0101-KIT

4 Plugs, WBT™ solder, Torx™ key, boxed

Ultra fine machining grants smooth operation of unit. Unique plating process with final plating of 24k gold. Patented WBT™ barrel provides both adjustment and locking function. The barrel is finished in polished ruthenium. A slotted center pin allows a perfect fit. Teflon™ insulation. Strain relief captured with Torx™ T6 size set screw. Maximum cable diameter allowed is 9mm² / 0.354 inches².

WBT-0102Ag nextgen™ Signature (hybrid)

WBT-0102Ag-KIT

4 Plugs, WBT™ solder, Torx™ key, boxed

Contacts utilize passivated pure fine silver. The body is constructed with brass and then platinum plated to give a nice aesthetic appeal. The central contact assembly is made of Ultradid® and the negative contact uses Dyneon™. The barrel is comprised of brass with a shiny black piano lacquer finish. A characteristic impedance of 75 ohms makes this a perfect match for digital audio and video. The maximum size conductor that can be used is 1.5mm² / 16-17 AWG. Maximum diameter of cable with dielectric is 9mm² / 0.354 inches². The barrel is offered in black only.

WBT-0102Cu nextgen™ Topline (hybrid)

WBT-0102Cu-KIT

4 Plugs, WBT™ solder, Torx™ key, boxed

As above with contacts manufactured from pure oxygen free copper which is plated with a thin layer of 24k gold to provide protection from oxidation. The barrel is offered in black only.

WBT-0108 Topline

WBT-0108-KIT

4 Plugs, Torx™ key, boxed

Crimp version of the WBT-0101. It is recommended that the signal contact (maximum 16 AWG) and ground (maximum 14 AWG) conductors first be prepared with a crimp sleeve. Connection is made by fastening the conductors with the supplied Torx™ T6 size set screws. The greatest cable diameter that can be accommodated is 9mm² / 0.354 inches².

Product List • Effective January 1, 2007
RCA TYPE CONNECTORS - RoHS COMPLIANT
ILLUSTRATIONS NOT TO SCALE

WBT-0110Ag nextgen™ Signature (pure)
WBT-0110Ag-KIT

4 Plugs, WBT™ solder, Torx™ key, boxed

Passivated pure fine silver contacts. The body is constructed of Ultramid®, while the negative contact uses Dyneon™. The Barrel is comprised of Al/Mg alloy for improved rejection of EMI. With a characteristic impedance of 75 ohms, the WBT-0110 makes the perfect match for digital audio and video. The maximum size conductor that can be used is 1.5mm² / 16-17 AWG. Maximum diameter of cable with dielectric is 9mm² / 0.354 inches². Connector body available in nine different colors for multichannel identification. The barrel is offered in cobalt blue only.

WBT-0110Cu nextgen™ Topline (pure)
WBT-0110Cu-KIT

4 Plugs, WBT™ solder, Torx™ key, boxed

As above with contacts manufactured from pure oxygen free copper and plated with a thin layer of 24k gold to provide protection from oxidation. Barrel offered in cobalt blue only

WBT-0144 Midline
WBT-0144-KIT

4 Plugs, WBT™ solder, Torx™ key, boxed

As a midline offering of the WBT-0101, this connector has all the same style and finesse. Differences include a barrel finished in matte black, lower yet efficient machining tolerances and lesser percentage oxygen free copper alloy stock. The largest outside diameter cable that can be accepted by this RCA type connector is 9mm² / 0.354 inches².

WBT-0147 Midline
WBT-0147-KIT

4 Plugs, WBT™ solder, Torx™ key, boxed

While being a compact version of the WBT-0144, shorter and thinner, this connector works well on smaller diameter cables. With a maximum cable diameter of 7.8mm² / 0.307 inches², this is the smallest RCA type plug manufactured by WBT.

**WBT-0150 Topline****WBT-0150-KIT**

2 Plugs, WBT™ solder, Torx™ key, boxed

This connector is an oversized version of the WBT-0101 with similar construction and features. Accommodates a cable diameter between 9.1-11.3 mm² / 0.358-0.445 inches².

**WBT-0152Ag nextgen™ Signature (hybrid)****WBT-0152Ag-KIT**

4 Plugs, WBT™ solder, Torx™ key, boxed

A new (2007) version of the WBT-0150 connector. Improved to utilize the nextgen™ insert. Contacts utilize passivated pure fine silver. The body is constructed with brass and then platinum plated to give a nice aesthetic appeal. The central contact assembly is made of Ultramid® and the negative contact uses Dyneon™. The barrel is comprised of brass and finished in a glossy piano black color. A characteristic impedance of 75 ohms makes this a perfect match for digital audio and video. The maximum size conductor that can be used is 1.5mm² / 16-17 AWG. Maximum diameter of cable with dielectric is 9.1-11.3 mm² / 0.358-0.445 inches².

The barrel is offered in black only.

**WBT-0152Cu nextgen™ Topline (hybrid)****WBT-0152Cu-KIT**

4 Plugs, WBT™ solder, Torx™ key, boxed

As above with contacts manufactured from pure oxygen free copper which is plated with a thin layer of 24k gold to provide protection from oxidation. The barrel is offered in black only.

RCA TYPE SOCKETS - RoHS COMPLIANT

ILLUSTRATIONS NOT TO SCALE

WBT-0201 Topline

WBT-0201-KIT

2 Sockets, WBT™ solder, boxed

This RCA type socket is a favorite among many audio enthusiasts. Featuring 99.996% high copper content, the dual prism spring loaded contact, WBT's 24k gold supra-plating process and Teflon™ dielectric. Socket tightens from the outside of a chassis using the included mounting nut. The complete unit includes insulation washers to accommodate a panel thickness from 0.1mm - 4.2mm.

WBT-0210Ag Ms nextgen™ Signature (metal nut)

WBT-0210Ag Ms-KIT (metal nut)

2 Sockets, WBT™ solder, boxed

WBT-0210Ag nextgen™ Signature (pure)

WBT-0210Ag-KIT (pure)

2 Sockets, WBT™ solder, boxed

The highest quality socket available on the market, with passivated pure fine silver contacts for both positive and negative connections. The positive contact utilizes a new tulip shaped spring loaded design to assure a secure connection. Air used as a dielectric surrounds the positive contact. The main body is comprised of 30% glass reinforced Ultramid® with the ground (negative) contact embedded within the connector. The complete unit includes removable insulation washers to accommodate a panel thickness from 0.1mm - 4.2mm.

WBT-0210Cu Ms nextgen™ Signature (metal nut)

WBT-0210Cu Ms-KIT (metal nut)

2 Sockets, WBT™ solder, boxed

WBT-0210Cu nextgen™ Signature (pure)

WBT-0210Cu-KIT (pure)

2 Sockets, WBT™ solder, boxed

As above with both contacts, positive and negative, manufactured from pure oxygen free copper and plated with a thin layer of 24k gold to provide protection from oxidation.

RCA TYPE SOCKETS - RoHS COMPLIANT

ILLUSTRATIONS NOT TO SCALE

PCB MOUNT

WBT-0234 Topline

Right angle, printed circuit board version of the WBT-0201 with a screw to secure the connection to a printed circuit board. The ground contact is made through the securing screw to the PCB and two additional solder points. The signal, or positive contact, has one solder contact point.

WBT-0244 Midline

The WBT-0244 is a midline version of the WBT-0201 which differs in the copper content of the main body and the machining tolerances.

PCB MOUNT

WBT-0274 Midline

A midline offering of the WBT-0234, this connector provides a single ground and signal or positive mounting position. The socket body is machined of a lower percentage copper alloy, but the positive contact is made of 99.996% pure copper as with all WBT sockets.

ILLUSTRATIONS NOT TO SCALE

WBT-0600 Topline**WBT-0600-KIT**

4 Plugs, 1 Torx™ key, boxed

Top quality banana plug with robust design and sleeve with polished ruthenium finish. Offering high contact pressure due to an expanding inner spike ensures a solid mechanical fit. Termination fitted with two Torx™ screws size T6 for secure crimp connection as well as cable strain relief. Easy fit for wire size up to 10mm² / 8 AWG.

WBT-0644 Midline**WBT-0644-KIT**

4 Plugs, 1 Torx™ key, boxed

A midline offering of the WBT-0600. Differences include a barrel finished in black, lower yet efficient machining tolerances and lesser grade oxygen free copper alloy stock. The largest diameter cable accepted for termination is 10mm² / 8 AWG.

CE COMPLIANT**STACKABLE****WBT-0645 Midline - Safety Line****WBT-0645-KIT**

4 Plugs, 1 Torx™ key, boxed

An Innovative banana plug approved worldwide as a loudspeaker cable connector due to the safety pin design. It is fully insulated using Makrolon®. A secure connection is possible through an expanding inner spike which provides high clamping power. Using only one hand, cables can be connected in tight spaces with just thumb and forefinger. The WBT-0645 is stackable for bi-wiring. Two Torx™ screws for extra tight pressure connection and additional cable strain relief. Connector can accommodate a cable diameter size of 10mm² / 8 AWG.

CE COMPLIANT**WBT-0660Cu Topline****WBT-0660Cu-KIT**

4 Plugs, 1 Torx™ key, boxed

High current spade lug with elastomeric shock absorber for progressive contact pressure eliminating structure born and air born noise as well as magnetostriction. Fully insulated body conforms to international safety standards. 1/4 inch / 6.4mm sandwich spade connector. Pure oxygen free copper contact is direct gold plated to protect against oxidation. Easy fit for wire sizes up to 10mm² / 8AWG.

CE COMPLIANT**WBT-0680Cu Topline****WBT-0680Cu-KIT**

4 Plugs, 1 Torx™ key, boxed

Same as the WBT-0660Cu but in a larger size of 5/16 inch / 8.1mm sandwich spade connector. Easy fit for wire sizes up to 10mm² / 8AWG.

Product List • Effective January 1, 2007

BINDING POSTS - RoHS COMPLIANT**ILLUSTRATIONS NOT TO SCALE**

	Retail
WBT-0702.01 Topline	\$53.00
WBT-0702.01-KIT 2 posts, 1 Torx™ key, boxed	\$110.00
<p>With a 400 ampere continuous current capability, this is the perfect size binding post for demanding applications. A patented clamping mechanism makes it possible for high compression connection of spades and crimped wire ends up to 6mm² (10AWG). By means of a collet chucking device, any 4mm² banana plug can be securely clamped. Milled grooves on both sides of the compression plate provide high strength for connection of spades. <u>No tools</u> are required to provide a secure connection. Finger tightening is all that is required. This connector will not fit on 3/4" or 19mm center to center spacing.</p>	
WBT-0702.03 Topline	\$51.00
WBT-0702.03-KIT 2 posts, 1 Torx™ key, boxed	\$106.00
<p>Same as above (WBT-0702.01) but with a glass bead blasted finish in velours chromium. Looks like sand blasted nickel.</p>	
WBT-0702.11 Signature	\$64.00
WBT-0702.11-KIT 2 posts, 1 Torx™ key, boxed	\$132.00
<p>Comparable design as the WBT-0702.01 except it is manufactured using cold rolled 68% copper alloy. The connector is then plated with a single layer of 24k gold to protect against oxidation. Finally, it is polished by hand to give an extreme finish.</p>	
WBT-0702.12 Signature	\$64.00
WBT-0702.12-KIT 2 posts, 1 Torx™ key, boxed	\$132.00
<p>This binding post makes use of the same features as the WBT-0702.11 but with a highly polished platinum finish.</p>	
CE COMPLIANT	
WBT-0710Ag nextgen™ Signature	\$60.00
WBT-0710Ag-KIT 4 posts, WBT™ solder, boxed	\$244.00
<p>A 30 ampere continuous current rating makes this connector sufficient for most audio functions. Made with passivated pure fine silver. Spade lugs measuring 6mm, standard 4 mm² banana plugs and wire with a diameter of 6mm² (10AWG) can be accepted. Maximum mounting depth of 4mm without use of puzzle washer. Recommended use with WBT mounting plates on page 17. Can be terminated with 6.1mm / 0.25 inch quick disconnect found on page 15.</p>

1 velours chromium exterior bracket

2 fan shaped washers

BINDING POST ACCESSORIES CONTINUED

ILLUSTRATIONS NOT TO SCALE

WBT-0799 Safety Stick

Retail

\$0.50

Specially shaped plastic peg inserts into binding post banana hole. Required to accomplish CE safety conformity (red, white & black).

WBT-9404 Spacer Block – 3/4" (19mm) spacing

\$3.00

Fits all binding posts except WBT-0702 and WBT-0710 series. Plastic insulating spacer block. Available in red, white, or black. Post can adjust in angle every 30 or 45 degrees.

WBT-0721 PCB Adapter Block

\$6.00

Fastens horizontally or vertically to circuit board with included bolt and lock washer. Torx™ screw fastens jumper wire, other end of lead wire connects to binding post.

WBT-9102 Antifatigue Bolt

\$2.00

Antifatigue bolt with fan shape washer. Used with WBT-0780 and WBT-0785.

WBT-9150 Fan Shape Lock Washer

\$1.00

Recommended addition to all WBT binding posts.

WBT-9302 Chrome Plated Counternut, M9 thread

\$1.00

Specialty nut only available from WBT.

WBT-9303 Gold Plated Counternut, M9 thread

\$2.00

Specialty nut only available from WBT.

Replacement T-6 Torx™ Set Screws

\$2.00

Available 4mm - 8mm lengths. Please specify length when ordering.

WBT-QD25

\$0.30

Gold plated brass quick disconnect for use with WBT-0710 series binding posts. Allows solder free connection to binding post.

WBT-9410

\$2.00

To take best advantage of the puzzle washers, at least two should be clipped together. They can be arranged to obtain either 0.75" (19mm) or 1.181" (30mm) spacing. The puzzle washer allows a very tight terminal installation on housings from 0.1mm - 10mm thickness.

POWER BRIDGE JUMPER - RoHS COMPLIANT

ILLUSTRATIONS NOT TO SCALE

WBT-0725 Cu Power Bridge - Safety Line
 Pure copper, gold plated

Retail

\$17.00

WBT-0725 Ag Power Bridge - Safety Line
 Pure silver, platinum plated

\$34.00

WBT-0726 Economy Power Bridge
 Pure copper, velour chromium plated
 Non-insulated and not vibration damped

\$8.00

Designed primarily for the OEM market to meet strict European CE safety standards, the WBT-0725 Cu/Ag Power bridge replaces the brass jumpers found as standard equipment on most speakers.

Uninsulated jumpers are no longer legal in Europe as they pose a shock threat due to lack of insulation. The WBT Power Bridges address this problem as they are fully insulated with Makrolon® plastic for shock protection and, because both terminals are removed at the same time, the “live-wire” situation is avoided. The back of the Power Bridge is damped with an elastomer to minimize vibration.

Power Bridges can be used in conjunction with any WBT™ binding post (except the WBT-0702 series). When purchased with WBT™ posts, Power Bridges make an excellent modification to any bi-wire loudspeaker. Please refer to the diagram to the left for required mounting dimensions. These dimensions are the only that work. The WBT power bridges are not flexible.

Tools

WBT-0198 nextgen™ assembly tool

Retail

\$3.00

Used for the unassembly and assembly of nextgen series of RCA type plugs. One tool is all that is required.

WBT-0299 RCA Socket Wrench

\$44.00

Specially designed for tightening the metal mounting nut on WBT™ RCA type sockets. Spike on tool fits into hole in mounting nut. Permits tightening without scratching the nut or socket.

WBT-0717 Holding Tool

\$65.00

Used when mounting binding posts. Snaps into the two posts and holds them in alignment. The WBT-0717 also prevents the posts from rotating while tightening the nuts.

WBT-0499 Cutting Shears

\$90.00

Shears cut through fine stranded copper cable up to #5AWG with a cleaving action for a clean even cut. Gold plating protects against corrosion. With a little practice, also good for stripping speaker cable.

WBT-0403 Crimping Pliers

Crimping pliers with special multiple spike jaw. The only tool designed to correctly crimp WBT™ crimp sleeves. Gold plating protects against corrosion. Comfortable, plastic-coated grip.

WBT-0411 Crimp KIT

Includes one WBT-0403 crimping pliers and an assortment of copper crimp sleeves in a convenient carrying case. Silver sleeves sold separately. Copper sleeves included with the WBT-0411 are as follows:

20 pcs WBT-0430	20 AWG (uninsulated)	20 pcs WBT-0442	14-13 AWG
20 pcs WBT-0431	18-19 AWG (uninsulated)	20 pcs WBT-0443	11-12 AWG
20 pcs WBT-0432	17 AWG (uninsulated)	20 pcs WBT-0444	9-10 AWG
20 pcs WBT-0433	15-16 AWG (uninsulated)	10 pcs WBT-0445	7-8 AWG

WBT-0488 Torx™ Key

T-6 size fits all WBT™ set screws. For temporary use only.

WBT-0481 Torque Screwdriver

The WBT-0481 is a precision torque screwdriver with an elegant design. Torque is set to 5 dNm for precise tightening of all WBT parts utilizing the Torx™ T-6 size. 4mm² hole in the end for the attachment of a ground lead, if a static electricity ground is needed. Includes one T-6 Torx™ bit.

WBT-0490 Torque Screwdriver Set

This kit includes one WBT-0481 Dyna-key along with the WBT-0484 bit assortment in a jewel case for keeping it all together. Additional bits are available separately. (see below)

CRIMP SLEEVES - RoHS COMPLIANT

ILLUSTRATIONS ARE TO SCALE

WBT™ cable end sleeves are made of special oxygen free copper or pure fine silver. Available in all standard sizes from 0.5mm² - 16mm², also with transparent insulation collar from 1.5mm² - 16mm². Insulated sleeves provide additional cable strain relief. Available in bulk bags, assortments or single pieces. Copper sleeves are 24k gold plated and silver sleeves are platinum plated.

RCA TYPE CONNECTOR TIGHTENING INSTRUCTIONS

Step 1
Loosen barrel of the male connector.

Step 2
Insert the connector into the socket.

Step 3
Hold the connector body and tighten the barrel.

WARNING: To prevent damage to cable and/or socket, turn barrel only, do not allow connector body to turn! Do not over tighten!

REMEMBER TO REVERSE ABOVE STEPS WHEN REMOVING THE CONNECTORS. Failure to properly unlock the connector may result in equipment damage!

RCA Socket Mounting Dimensions

WBT-0234

WBT-0274

All WBT RCA Type Sockets require the following mounting hole dimensions

WBT-0645 Install Instructions

Tightening knob

NOTICE:
Expanded pin
when tightened

Remember to reverse above steps when removing the connector. Failure to properly unlock the connector may result in equipment, cable, or connector damage!

Step 1

Loosen tightening knob. Insert into the connector.

Step 2

Tighten the knob by turning clockwise.

Step 3

After tightened, the connector should look like this.

WARNING! Do not fully tighten knob unless inserted into banana hole.

Binding Post Assembly

Binding post hole cutout dimensions for insulation washer (measurements in mm)

CRIMPING TECHNIQUE

ILLUSTRATIONS NOT TO SCALE

WBT's crimping technique has been designed to ensure a high quality and durable crimp. For the procedure itself, one must strip the desired cable and insert it into the proper size crimp sleeve. Then, carefully place the wire and sleeve into the proper slot on the crimper and apply a powerful squeeze. WBT's unique crimp tool design creates a crescent shaped crimp which forces the wire to flow together, thus creating the illusion of a single strand of wire. Trim the sleeve, including the wire, to the desired length to fit the application. When using one of WBT's solderless connectors, simply loosen the set screw on the connector then insert the crimped end of the cable into the connector, tighten using the Torx™ bit.

Wire is stripped and the appropriate size crimp sleeve is slid onto the strands.

Sleeve is then crimped onto wire with crimping pliers.

The result should look like this.

Use WBT-0499 cutters to trim crimped wire end to fit in WBT™ crimp technique connector.

Crimped cable end ready for use in WBT™ crimp technique connectors.
